

## 2V. Program Management Fundamentals for the Biosafety Professionals

September 19, 2025 | 11:00 am – 3:00 pm CDT  
Virtual Professional Development Course

### Instructors:

Lolly Gardiner, MBA, RBP(ABSA), CBSP(ABSA), MRIGlobal, Kansas City, MO  
Jane Alam, ASQ CMQ/OE, ASQ CQA, MRIGlobal, Kansas City, MO

### Overview

This course is designed for biosafety professionals who are responsible for overseeing biosafety departments. The principles and practices briefly covered in this course are closely related to the Program Management Professional (PMP) certification. By understanding the core competencies of the PMP framework, biosafety professionals can apply project management methodologies to enhance the planning, execution, and evaluation of their biosafety programs. This integration of program management skills with biosafety expertise ensures that participants are well-prepared to lead effective, compliant and sustainable biosafety programs within their organizations. In addition, the course aligns with key international standards and guidelines, such as ISO 35001, which specifies requirements for a biosafety risk management system. Participants will gain insights into how to integrate ISO 35001 principles into their biosafety programs, ensuring a systematic and effective approach to biosafety risk management. The course also covers the World Health Organization (WHO) Biosafety Programme Management Associated Monograph, providing a global perspective on best practices for managing biosafety risks. By familiarizing themselves with the WHO guidelines, participants will be better equipped to implement and maintain robust biosafety programs that meet international standards.

### What You'll Learn

- **Integration of Project Management Methodologies** – Focus on **planning, execution, and evaluation** of biosafety initiatives using structured project management tools and techniques
- **Implementation of ISO 35001 Standards** – Emphasis on creating a **systematic and effective approach** to managing biosafety risks.
- **Adoption of WHO Biosafety Programme Guidelines** – Provides a **global perspective** and best practices for managing biosafety risks in compliance with international expectations

### Objectives:

- Summarize program management principles and methodologies tailored specifically for biosafety applications
- Recognize skills needed to identify, assess, and mitigate management risks effectively
- Apply PMP, ISO 35001 and WHO applications to biosafety

✓ **Suggested Background:** Fundamentals of Biosafety

👤 **Who Should Attend:** New Biosafety Professionals, All Safety Professionals

📄 **Course Logistics:** Course is one 4-hour session. Attendees will need to log on 15 minutes prior to the start time. There will be a 15-minute break during the course. To receive credit and a certificate, attendees must attend the session and complete or access all course modules. The course materials are for **registered participants only**.

💰 **Course Fees:** **\*ABSA Member: \$300      Non-member: \$390**  
\* To receive the ABSA member rate, participants must be current ABSA members during the training year. Fees include course handouts, access to the ABSA International training site, and 4 hours of expert-led interactive instruction.

📋 **Credits:** This course has been approved for **0.5 CM points** toward RBP/CBSP recertification. \*ABSA International is approved as a provider of continuing education programs in clinical laboratory sciences by the ASCLS P.A.C.E.® Program. This course is approved for **3.5 P.A.C.E.® contact hours**. Course access links are unique and for individual use only. **Sharing is prohibited**. Duplicate logins or unregistered attendees will be removed from the webinar without a refund.

❓ **Questions:** Contact: Kari DeServi, MEd, Director of Education, ABSA Office, 866.425.1385 (toll free)
